

P3G MEETING  
FAIRMONT QUEEN ELIZABETH HOTEL  
April 26th 2010  
Montréal, Québec

# Code of Conduct for Data Sharing in Genomic Research

"OF COURSE I VALUE MY PRIVACY...THAT'S WHY I ONLY SHARE MY PERSONAL INFORMATION WITH 700 OF MY CLOSEST FRIENDS!"

*"The databank would be glad to give you information about yourself, but unfortunately the databank is not convinced that you are really you."*

# Code of Conduct for Data Sharing in Genomic Research

- “Restrictions on access to information at any stage of the innovative process obstruct the flow of scientific information and thereby impede scientific progress. Such restrictions are also contrary to the needs of scientific inquiry and are inimical to openness and transparency.”
  - The University of Manchester, Institute for Science, Ethics and Innovation, *Who Owns Science? The Manchester Manifesto*, 2009.

# Code of Conduct for Data Sharing in Genomic Research

- Both P3G and the ENGAGE have decided to develop a Code of Conduct on Data Sharing.
- The Code of Conduct has a dual purpose:
  - Elucidate shared values;
  - Provide guidance on the basic obligations flowing therefrom.

# Code of Conduct for Data Sharing in Genomic Research

- The Code of Conduct has two foundations:
  - Mutual respect and trust between scientists, stakeholders and participants;
  - A commitment to safeguarding public trust, participation and investment.

# Data Sharing Principles

Quality

Accessibility

Responsibility

Security

# Data Sharing Principles
